# Features of *AMMR*

1. It is an open access journal that allows non-members of JSMMR to submit manuscripts.
2. It widely targets both methodological and empirical studies of mixed methods research
3. It accepts research protocols
4. It is bilingual with manuscripts in either Japanese and English and incorporates the J-Stage Platform that allows authors to quickly publish accepted papers
5. It allows the published work to be internationally recognized
6. The review process, in which the assigned editor will coordinate an agreement between two reviewers to get the feedback to the author, is more transparent.
7. We are honored to have the world known mixed methods researchers in the list of the peer reviewers.
